CLEAN TECHNOLOGY

Lawyers in the Faegre & Benson LLP clean technology team address the unique legal needs of companies operating in the clean technology sector.

EXPERIENCE MATTERS

Clean technology encompasses an array of emerging industries with a common purpose: to create a diversity of clean and renewable energy sources; to increase energy efficiency and reduce waste; and to mitigate the environmental impact of historical energy, population, and industrial policies and practices. When working to conserve the natural resources and systems of the planet, experience matters.

Faegre & Benson's clean technology attorneys are dedicated to representing companies and investors that are creating novel and compelling products and services that will positively affect human quality of life globally in the next decade and for decades to come.

Faegre & Benson has experience in virtually every segment, including:

- Renewable energy, including biofuels, wind, solar and geothermal
- Smart grid/energy efficiency
- Air, water and waste
- Transportation
- Carbon capture
- Green building
- Sustainable and organic products

We handle the full range of legal needs of clean technology companies, including:

Corporate. Clean technology entrepreneurs and venture investors use our services because we provide practical, cost-effective advice based on deep business experience and a commitment to contributing to the bottom line.

Faegre & Benson has significant experience in virtually every clean technology segment, including biofuels, wind, solar, geothermal, smart grid, energy efficiency, carbon capture, green building and sustainable products.

Clean technology entrepreneurs and venture investors use our services because we provide practical, cost-effective advice based on deep business experience and a commitment to achieving the critical success factors of your business.

Financing. Faegre & Benson clean technology attorneys have represented companies and investors who have raised more than \$5 billion of equity and debt financing in the past ten years to fund technology development and facility construction of biofuels, wind, solar and environmental remediation projects worldwide.

Technology Strategies. Faegre & Benson attorneys spend the time necessary to understand our clients' go-to-market strategies, objectives and requirements. We structure, draft and negotiate all types of intellectual property agreements—always with an eye toward achieving business objectives while protecting our clients' innovations.

International. We manage complex cross-border matters and have built close relationships with experienced corporate lawyers in other countries where local counsel may be needed. Our team works collaboratively across borders to identify and avoid issues that may slow down or derail a transaction, and to assure that the deal is structured in order to achieve the client's business goals.

Litigation. Faegre & Benson's litigators help new energy clients resolve a wide variety of disputes, including matters surrounding commercial relations, natural resources, energy disputes, federal lands, environmental matters in state and federal courts, toxic tort, land use and construction.

INDUSTRY EXPERIENCE

Faegre & Benson clean technology attorneys understand the technical and regulatory aspects of clean technology development and deployment, including engineering, chemistry, hydrology, biology and toxicology and environmental law.

Faegre & Benson LLP offers a full complement of legal services to clients ranging from emerging enterprises to multinational companies. Its 500 lawyers handle complex transactions and litigation matters throughout the United States, Europe and Asia. Established in Minneapolis in 1886, the firm is one of the 100 largest law firms in the United States. From its offices in Minnesota, Colorado, Iowa, London and Shanghai, Faegre & Benson has served clients in nearly 100 countries. For more information, please visit www.faegre.com.
